

Read Me

All the documents included in this CD are on the Houston Gem and Mineral Society Web site WWW.hgms.org . Go to the K12 education button and you will find all sorts of materials including things written after I made the CD. For example, I am trying to write a set of exercises that will apply these materials to TEKS and you will not be surprised that I am having trouble understanding the TEKS documents. Please go to the web site for a copy of my attempt and use it as you see fit. If you have a better plan, please tell me.

Our intention is to provide a collection of fossils that will assist you in teaching Earth Science. You will get a collection of fossils but not every fossil that is on the spreadsheet. Our collections are mostly gathered by our members and it just depends what is there to collect.

If you have any suggestions, please email paleo@hgms.org.

When you read this document, please email us at the above address and let us know if it is useful. I guarantee you will get a good response if you need additional material.

Mounting Suggestions: If you have the space, you might glue the fossils to a board or put them in trays.

Neal Immega
